

Instruction Sheet

Model D3271

Air Regulator w/Filter

INTRODUCTION

The SHOP FOX® Air Regulator w/Filter (Figure 1) is great for controlling air pressure, trapping moisture and cleaning air in pneumatic systems.

SETUP

The Model D3271 accepts 1/4" NPT threads. Mount the regulator as close as possible to the air tools. Keep in mind that water will drain from the collection cup when the airline is not pressurized, so do not mount in a moisture sensitive location. See Figure 2 for airline connection information.

ADJUSTMENT

The Model D3271 features a locking adjustment knob. Pull the knob up to adjust the pressure, and push the knob down to lock the adjustment knob in place. **DO NOT adjust the regulator over 150 PSI!**

MAINTENANCE

Always drain the collection cup if moisture reaches the max. drain level. This can be done in two ways: 1) Depressurize the airline; 2) Push the drain valve up.

Unscrew the collection cup and clean with a clean dry cloth as needed. Avoid using solvents or cleaners that would be hazardous to the cup material!

CUSTOMER SERVICE

For questions contact Woodstock International Technical Support at (360) 734-3482, or send e-mail to: tech-support@shopfox.biz.
